

1- First of all, I go to my imputation screen :

Test	Expert Développement	17/05/2021	17/05/2021	0	0	0	0	0	0	0	0	0	0	0
------	----------------------	------------	------------	---	---	---	---	---	---	---	---	---	---	---

2- I put 1 by each field

Test	Expert Développement	17/05/2021	17/05/2021	0	7	1	1	1	1	1	1	1	1	0
------	----------------------	------------	------------	---	---	---	---	---	---	---	---	---	---	---

3- I save it

And I have a green message to say that save is good.

4- I refresh my page

5- I have this show :

Test	Expert Développement	17/05/2021	13/06/2021	0	0	0	0	0	0	0	0	0	0	0
------	----------------------	------------	------------	---	---	---	---	---	---	---	---	---	---	---

An other example with planification :

5	2,45	2	2
0	0	0	0

 → I put 1

And I have this result :

0	0
1,45	2
0	0

My planned time is minus by 1 but I have not my imputation time.

I put my php.ini file in ticket.
