You move projectorriaV2.6.3 one step up instead of moving projectorria one step up.

What you need to get is :

C:\Program Files\EasyPHP12.1\www\projectorria

The screenshot shows a Windows Explorer window with the address bar set to `C:\Program Files (x86)\EasyPHP-12.1\www`. The left sidebar shows the navigation pane with 'Disque local (C:)' selected. The main pane displays a list of files and folders:

Nom	Modifié le	Type	Taille
