127.0.0.1 / 127.0.0.1 | php... Project'Or RIA

Database schema name : projectorria
Name to be displayed : My Own Project'Or RIA
Database prefix for table names :
Database instance name
any value possible to identify connected database
prefix on table names, used to store several instances under same schema, may be left blank

Allow login from Ldap : false
Ldap Base DN : dc=mydomain,dc=com
Ldap Host address : localhost
Ldap Port : 389
Ldap version : 3
Ldap Search User : cn=Manager,dc=mydomain,dc=com
LDAP Search User Password : secret
Ldap filter : uid=%USERNAME%

'true' or 'false', if set to true, Projectorria can log user from Ldap
Ldap Base DN (dc=mydomain,dc=com)
Ldap Host address (server name)
Ldap Port (default is 389)
Ldap version (can be 2 or 3)
DN of Ldap user used for search functionality
Password of Ldap user used for search functionality
Ldap filter to find used name (must include %USERNAME%)

eMail address of sender :
eMail address to reply to :
eMail of administrator :
SMTP Server : localhost
SMTP Port : 25
Sendmail program path :

a valid email as sender for mailing function
a valid email to define the reply to for mailing function
a valid email of the administrator (will appear on error messages)
address of SMTP (mail) server, may be left blank (default is 'localhost')
port to talk to SMTP (mail) server (default is '25')
to set only on issue to send mails, or not using default sendmail

Default password for initialization : projector
Min length for password : 5
Default locale to be used on i18n : en
Default time zone : Europe/Paris
Currency : €
Currency position : after

any string possible as default password
any integer, to force a long password (keep is reasonable)
default language, 'en' for English, 'fr' for French, 'de' for German (more locales to come next)
default time zone, list can be found at <http://us3.php.net/manual/en/timezones.php>
currency displayed for costs
position of currency displayed for costs

Use fading mode for frames refresh : true
Icon size on menu tree : 22
Default color theme, proposed while login : ProjectOrRia

'true' or 'false', if set to 'true' screens will appear in a fading motion
'16' for small icons, '22' for medium icons, '32' for big icons
select a theme in the list

Directory to store Attachments : ../files/attach/
Max file size for attachment : 2097152
Temp directory for reports : ../files/report/
Memory limit for PDF reports : 512
Log file name : ../files/logs/projector_\$(date).log
Log level : 2
Parameter file name : ../files/config/parameters.php

any valid directory, set to empty string to disable attachment
size in bytes (1024 * 1024 * MB)
any valid directory in the web structure
any numeric value, for size in MB
any valid file name, may contain '\$(date)'.log to get 1 file a day
'4' for script tracing, '3' for debug, '2' for general trace, '1' for error trace, '0' for none
a php file name where to store parameters, use non web access directory for security
